Back to Back
X-Type

(Closed top stop both ends)

Head to Head
O-Type

(Closed bottom stops both ends)

These functions are employed depending on use. There are various kinds of zippers which have functions other than these.

(Open ended zippers are normally Right-Insert with the insert pin on the wearer's right, as shown in 'B' and 'C' above. However 'left-insert' type, usually required by buyers in USA, can only be supplied if specified at the time of ordering.
